

Dear Sir,  
I am writing to urge you to reject NAB's petition 04-160.

In my job I travel extensively and take my XM receiver with me. This not only provides me with the quality and variety of their programming but also provides me with weather and traffic reports for the regions that I am visiting. XM is a tool that makes my job easier and I am willing to pay for the service they provide.

The National Association of Broadcasters should not have the ability to dictate what XM can provide. They should not have the opportunity to reduce the services that I have elected to pay for.

I respectfully ask that you reject NAB's petition 04-160.

Thank you,

Philip Godden
